WHY CHOOSE RYCO ONE-PIECE FITTINGS?

Ryco Hydraulics' One-Piece Fittings simplify hydraulic hose assembly by combining the insert and ferrule into a single preassembled component. With fewer parts to handle during assembly, they support efficient, consistent outcomes and can help improve productivity in workshops assembling repetitive hose configurations.

Product Range:

Features & Benefits:

- **One-Piece Design:** Combines the insert and ferrule into a single component.
- **Single Part Number:** Supplied under one part number for simplified product management.
- **Simplified Product Management:** A single part number for the insert and ferrule, making order management easier.
- **Reduced Mismatching Risk:** Helps prevent incorrect component combinations during assembly.
- **Easier Assembly Process:** Supports faster and more consistent hose assembly.
- **Reliable Performance:** Promotes assembly accuracy and dependable hose operation.
- **Application Versatility:** Suitable for construction, mining, manufacturing, agriculture, and mobile equipment applications.

Disclaimer: We reserve the right to modify our products and/or related services and/or discontinue the manufacture and/or supply of any of the products and/or related services, without notice. This document supersedes all previous versions and previously issued documentation. The only official source of technical crimping parameters regarding our products is our Digital Crimp Tools. Printed copies are uncontrolled therefore, please be sure to use the latest versions of our Manuli Crimp App or Crimp Web Tool. Do not mix and match: always use Manuli original hoses and fittings. For more information, see our 'Safety Guide' by scanning the QR code.
